Re: How to remove shortcut virus removal from my pc? 🔑

From what i have read this not detected by many scanners. There are several sites posting fixes 1 such fix is

## How to Remove Shortcut Virus From Pendrive / USB Drive.

If your USB drive doesn't have important files you can try to Format it, but if it contains important files

**Step 1.** Go to Start and Search for cmd, as it appears in start menu *Right Click* on it and Click "Run as Ad

**Step 2.** Navigate to Flash Drive by typing its **letter**. [ Let's Say it is i ], to find your USB drive letter

**Step 3.** Type " **del \*.lnk** " (without quote) in cmd window and Hit **Enter** on your Keyboard.

**Step 4.** Now type " **attrib -s -r -h \*.\* /s /d /l** " ( without quote ) and hit **Enter** .

This from <https://www.itechfever.com/remove-shortcut-virus/>

I would download and run getsusp and submit the .lnk files this will warn McAfee of the file and hopefully detect it in a future c

Re: How to remove shortcut virus removal from my pc? 🔑

You can also use this reputable Removal Guide for a All-in-one Removal Of Adware/Browser Hijackers/etc.

Especially the Zemana Anti-Malware Tool

[How to easily clean an infected computer \(Malware Removal Guide\)](#)

Re: How to remove shortcut virus removal from my pc?

McAfee VirusScan Enterprise has always done the job right, use that one
